PRODUCT PROPERTIES / APPLICATION AREA:

CUREA SOFT cares for sensitive and occupationally stressed skin. Due to the naturally moisture-binding ingredient urea and the skin care substance bisabolol, CUREA SOFT supports the regeneration process of previously damaged skin.

The skin protection cream also contains glycerin as an additional moisture-binding substance and rice germ oil (*Oryza Sativa*) as a lipid-balancing agent. CUREA SOFT has a highly efficient and lasting skin care effect. The cream is absorbed quickly and is also suitable for nail care. Moreover, the cream enhances the skin's water-holding capacity, it supports the regeneration of the skin's natural protective layer and it makes the skin smooth.

CUREA SOFT is able to support the regeneration process when the skin is confronted with attrition dermatitis or eczema.

CUREA SOFT unparfümiert (perfume- and fragrance-free version) can be used safely for personal hygiene in the food industry in consideration of the respective application instructions.

APPLICATION:

Apply CUREA SOFT carefully on the clean and dry skin. Rub in the cream evenly, paying particular attention to vulnerable areas such as between the fingers and around the nails.
