## CURA SOFT

Skin care cream for normal and slightly stressed skin

# CURA SOFT

Skin care cream for normal and slightly stressed skin

- for hands and facial application
- moisturizing O/W emulsion
- with bisabolol and rice germ oil
- absorbed quickly
- slightly greasy
- without mineral oil
- silicone-free
- perfumed

## PRODUCT PROPERTIES / APPLICATION AREA:

CURA SOFT cares for normal and slightly stressed skin and supports the regeneration process of damaged skin due to the ingredient bisabolol. CURA SOFT is an oil-in-water emulsion and contains the moisture-binding substance glycerine as well as rice germ oil (*oryza sativa*) as a moisturizing agent.

The cream increases the skin's ability to retain water, supports the regeneration of the natural acid mantle of the skin and improves the skin's smoothness. CURA SOFT also helps to foster the regeneration process when the skin suffers from dermatitis or eczema.

CURA SOFT is a skin care cream which is absorbed quickly and which is slightly greasy.

## APPLICATION:

Apply CURA SOFT on the clean and dry skin. Rub in the cream evenly, paying particular attention to vulnerable areas such as between the fingers and around the nails.

## PRODUCT DESCRIPTION:

White, quickly-absorbed and slightly greasy cream. O/W emulsion, silicone-free, skin-neutral pH value, without mineral oil, perfumed

## TEST SUMMARY:

A test summary is available on request.

## DERMATOLOGICAL COMPATIBILITY:

CURA SOFT's dermatological compatibility has been carefully tested and proven. A printed certificate is available.

## PRODUCT QUALITY:

The product is manufactured according to GMP (GOOD MANUFACTURING PRACTICE) requirements. The bacteria count is microbiologically tested on a regular basis and is under 100 bacteria per gram.

## FIRST AID:

If CURA SOFT accidentally gets into your eyes, rinse immediately with plenty of lukewarm water. If a burning sensation still persists, consult an eye doctor as measure of precaution.

## STORAGE INSTRUCTIONS:

CURA SOFT will keep for at least 30 months (from date of manufacture) if stored unopened at room temperature in the original packaging. The Period After Opening (PAO) is indicated on each tube / bottle
